

Ozone Packages

Our packages are the fastest, easiest and most cost-effective way to get everything you need for ozone therapy. Once you know what you want to accomplish, simply select the package that best suits your needs. More accessories are available to expand your setup even more.

Promolife offers the best support in the industry, before and after the sale. We can help you find exactly what you need. Use our instructional videos to set everything up quickly. We are also available by phone, email or Skype for all your questions.

How do I know which package is right for me?

Use this quick checklist to decide:

| My Goals: | Basic Insufflation Package | Comprehensive Package |
|--------------------------------------|----------------------------|-----------------------|
| Rectal, vaginal or ear insufflations | ♦ | ♦ |
| Ozonate water | ♦ | ♦ |
| Ozonate small amounts of oil | | ♦ |
| Breathe ozone | | ♦ |
| Small area ozone | | ♦ |
| Full body ozone | | ♦ |

Basic Insufflation Package

\$1059.00

Includes:

O3Elite Single or Dual Ozone Generator (Dual shown)

Water Bubbler/Humidifier Combo

Earscope

Five Luer Lock Catheters

Insufflation Bags (choice of 1000ml Bag or 5 Multi-Chamber Bags [shown])

Five Pack OzoMedic Ozone Suppositories

PurO3 Ozonated Oil Samples

Accessory Pack

Comprehensive Insufflation Package

\$1694.00

An extra note about the Comprehensive Package

If you plan to add steam or far infrared to your routine, you'll want the O3Elite Dual to achieve the highest ozone rates. The higher output of the Dual also allows water and oil to ozonate more quickly.

Includes:

- O3Elite Dual Ozone Generator
- Water Bubbler/Humidifier Combo
- Earscope
- Five Luer Lock Catheters
- Insufflation Bags (choice of 1000ml Bag or 5 Multi-Chamber Bags [shown])
- Ozone Oil Breathing Bubbler
- 2" Ozone Cup
- Two Nasal Cannulas (not shown)
- Five Pack OzoMedic Ozone Suppositories
- PurO3 Ozonated Oil Samples
- Accessory Pack

Only one thing to add...

Ozone requires a high grade oxygen source. You can use an oxygen concentrator or an oxygen tank with low flow regulator. Oxygen tanks allow for the highest purity possible but will need to be filled. Check locally to determine your options. An 870 tank (shown) is medical and requires a prescription. A 540 tank is industrial but you'll need to find a company to fill it locally. They may require that you buy one of their tanks.

Oxygen concentrators never have to be filled and create oxygen that is 93% to 95% pure. Our concentrators don't require a prescription. New and refurbished options are available. For complete details and prices, ask for the Oxygen Sources info sheet.
